

INFRARED OUTDOOR

Logan 2-Person Outdoor Infrared Sauna

The Logan 2-person outdoor infrared sauna combines modern design and premium craftsmanship with advanced wellness features. Built from natural aged Canadian hemlock with a weather-resistant paint and sealant and a metal composite roof, it stands up to the elements season after season. Powerful far-infrared heaters bring the cabin to your desired temperature, up to 140°F. Interior and exterior LED lighting, color-changing chromotherapy, a Bluetooth sound system, and an air purification system round out the experience. Easy-to-assemble panel construction goes together in about 1-2 hours with two adults.
